FOOT REFLEX ZONES WITH REIKI

Reiki is a natural healing tradition that has been practised for thousands of years. It was rediscovered and revived by the Japanese physician Mikao Usui in the middle of the 19th century. Reiki is the universal energy of life that flows through the hands of the practitioner – that channel it - as a healing, harmonising and rebalancing force. Reiki works on all levels: Body, mind, and soul.

The effects of Reiki can be summarised as follows:

- It stimulates natural self-healing.
- It revitalises body and mind.
- It removes blockages and promotes complete relaxation.
- It balances energy in the body.
- It raises the body's vibrational frequency.
- It promotes purification of the soul, self-awareness and harmonious development and therefore it improves personal stability.

It is difficult to express the impact of Reiki in words. You understand it better when you experience it.
